### About this example

The repayment example assumes a \$10,000 loan in the first year of school with two disbursements and that you remain in school for 4 years.

<sup>1</sup> This estimate assumes that your school certifies that you are a freshman. The estimated total period during which you will make both interest-only payments for 4 years and principal and interest payments for 11 years, is 15 years. If your school certifies that you are a sophomore, junior, or senior your Interest-Only Period will be reduced and your period of principal and interest payments will increase such that you are making payments for a total of 15 years (regardless of your actual school separation date).

<sup>2</sup> The estimated total loan period during which payments will be deferred and principal and interest payments will be made is 15 years. The actual date on which you will begin making payments will be the earlier of the 28th day of the month that is (i) 6 months after your expected graduation date; or (ii) 6 months after the date on which we determine that you no longer maintain at least half-time status at your school.

Loans that are subject to a minimum payment of \$50 may receive a shorter loan term.
